

Coffee catalogue

We connect growers, roasters, distributors and international buyers. We structure Arabica and Conilon/Robusta enquiries around quality, volume and transaction requirements.

Arabica

Coffea arabica. Sourced according to origin, crop year, processing method, physical grading and sensory profile for roasters and buyers.

Conilon / Robusta

Coffea canephora: Conilon and Robusta. Selection by lot, consistency, cup quality and end use, including blends and industrial applications.

Lot-specific quality

Screen size, defects, moisture and sensory assessment are separate criteria. Scores, certifications and tasting notes require supporting evidence. Samples and analysis reports must match the traded lot.

Technical information for a transaction

Identity	Species, variety, origin, crop year and lot identification.
Processing	Natural, pulped natural, washed or another declared process.
Physical grading	Screen size, defects, foreign matter and the grading standard used.
Testing	Moisture (%), sensory assessment, method, date and report when available.
Delivery	Net weight, packaging, timing, named place and commercial terms.
Documentation	Traceability, verified certifications and destination requirements for the transaction.

How we structure a transaction

1. Understand the buying requirement or selling offer and the intended use.
2. Assess alignment between specifications, volume, origin and destination.
3. Align samples, testing, pricing, payment and logistics.
4. The parties confirm terms, documentation and responsibilities in a contract.

Category catalogue for commercial enquiries. It is not a stock listing, firm offer or supply guarantee. Prices and specifications are subject to enquiry.

Buy or sell coffee

Leave requirements blank if not yet defined. Buyers: describe what you need. Sellers: provide available, documented lot characteristics.
